

## VEGETARIAN ENVIRONMENT

### Purpose:

To ensure the school employee, students and management enjoy a vegetarian environment

### Scope:

All employees, volunteers and students

### Policy:

Khalsa School enforces a vegetarian environment for the benefit of our students and employees.

### Procedure:

Employees must not bring any meat, seafood, fish, eggs, or food products with these ingredients in the school or on field trips.

During class celebrations, staff events, cafeteria lunches, and special events all employees have a responsibility to ensure that meat, seafood, fish, eggs, gelatin or food products with these ingredients are not served. Students are requested to use Vegetarian Bakeries.

All teaching staff have a responsibility to inform parents and students that they are not to bring the above mentioned food products in their lunches or any other food products they may be sharing with the student body. The onus is on the parents to ensure that their child does not come to school with these products.

Food cooked in the Khalsa School's campus kitchens for private, non-related school functions (not being served to the student during school days) will also be vegetarian.

Note: Food cooked for private functions will not be inspected for allergens.
